

Clients – i Darts India

Fyers Securities

“In the world of finance, data analysis is the most important function of an analyst. One of the most challenging tasks is to assimilate good quality and reliable data on a consistent basis. Due to the lack of options, analysts are forced to gather data from various different sources which waste valuable time and effort. I-darts Market Analytics platform enables analysts to access data with utmost ease, which improves efficiency and facilitates better analysis. Even though it is loaded with a vast amount of data, the user experience has not been compromised. The simplicity of the platform is amazing keeping in mind the complexity of the data presented to the user.

Overall, this product saves time, enables greater productivity and delivers the best user experience”.

“We have engaged Darts India a leading software company specializing in capital market solution to develop our Market Watch solution. They have delivered us a world class solution up to our satisfaction on timely manner. We found them to be a very responsive, customer oriented with great techno-functional and project management skillset. So far their post implementation remote support is excellent.

We would like to continue our association with them on various new initiatives, catering to the need of the market participants and to support exchange business growth. We wish Darts India team very best for their future endeavour”.

Basab Banerjee

Director IT

Congruent

At Congruent, we are obsessively passionate about solving the US retirement industry’s technology challenges using our CORE suite of enterprise solutions. As we embarked on upgrading the UI/UX of our platform to be ready for tomorrow, we evaluated several software companies to work with our UI design team and found iDarts to be the perfect foil for us. iDarts understood the needs of the demanding US market that we were articulating and works with our team as their extension rather than a vendor at an arms length !!

Co-Founder and CEO

NCDEX

"I-darts has delivered a World Class product in Ncharts. They met with our expectations in their knowledge and understanding of handling Real-Time Market Data and providing advanced Charting and Technical Analysis tools. We are delighted to have engaged them; they understood our product vision and helped us translate that into reality by overcoming technical challenges and without compromising quality. We are now expanding our engagement with them to launch the next generation of Ncharts. "

Vijay Kumar, Chief Business Officer

NCDEX Ltd

A great product and excellent support service is what distinguishes i-darts from its competitors. One stop shop for all needs of Market data, scanners, Charting Tools and Analytics makes Market Tracker (powered by i-darts) the most in-depth product available in the market. While there are various other software/data vendors in the market place, each one specializes only on one aspect leaving the other areas deficient. Market Tracker on the other hand has adopted a holistic approach to Market Analysis. It is as valuable for a trader as to an investor. Further, their quest for improvement leaves you spell bound with the management more than willing to solicit feedback and incorporate requirements to enhance user experience. A rare phenomenon in my experience of more than a decade in financial markets!

Jyoti Nangrani

CMT (Ex Research Analyst Aditya Birla Money Ltd)

"i-Darts has developed one of the best real-time market watch applications, with an in-depth information, technical analysis, charting tools, news, etc. which helps the traders and investors to take informed decisions. The sharp and intelligent way of managing the information is remarkable. Technically the product is designed efficiently in disseminating information by consuming a low bandwidth with minimal resource utilization."

Zameer G Syed

Trading Applications & Technology Expert

"I've been using Dartstock for a while now and am extremely happy with it. User friendly design and speed of data updates are the key features I like about the product. As a experienced Technical Analyst, I am also happy with the intra-day charting tool which is extensive and the ability to create and save templates is quite helpful. The screener tool is another useful feature. On the whole, it is a product I strongly vouch for; active traders can benefit a lot."

B. Krishnakumar

Technical Analyst

"I am an active trader on NSE and mainly trade in Futures and Options. I found your software to be the most complete software for the market information. It has unparalleled capabilities of charting and technical analysis tools. It has helped me find opportunities of profitable trades even in this highly volatile market. I have tried a

number of technical Analysis software, but after using your software, I realized what I was missing. Thank you for providing such a wonderful tool, which is extremely user friendly. It has made my decision making on entry and exits very easy. I would recommend it as a must for every trader.”

Jagdev Singh Gulliya

Day Trader

“I perused the features and other aspects of i-darts software. As a technical and functional consultant and also as a trader/investor, I am sure this system is among the top providers. It is user friendly, fast, feature rich and very efficient! It has powerful features like configurable opportunities finder to help traders to hunt for trading opportunities in market jungle!”

V. Santhanam

System consultant, Professional Investor

“I am an enthused active investor and have been using your product for some time now. The simple and intuitive user interface combined with the staggering functionality of the product simply thrills and eggs on an avid market enthusiast. The real-time market information, various smart scanners and advanced charting help the users with different risk appetite to evaluate risk, spot opportunities early on, make informed decisions and stay on the top of the trade session.”

Nanda Krishnan

Bangalore

“I have been watching I-darts provided Market tracker past 4 years.

I found the following features are very good.

Quote gives all information about the company (script) 52w high, low and all time high and low. Moving average ?those can trade with watching MA it is helpful without entering in to charts. While talking to client PE, EPS, Market cap and YTD very helpful all in one shot.

Flash data, FII activity data, Announcement, Board meetings

While trading: – Heat map, Market Dynamic, Market Breadth help me to get market trend.

Trade before:- Resistance and supports are accurate in market tracker. S2 S1 P R1 R2 are fantastic especially in nifty. I can say its 90% accurate. So many times i trade with R&S accurately.

Live scanner :- it gives good information for short and midterm traders like you can choose 3-6-12 months low stocks and high stocks. I suggest buy 3-6 -12 months low stocks especially nifty 50 stocks 100% get profits. Once i bought SIEMENS 3 months low and 6 months low got doubled the profit in long term with 1 year 2012.

FNO corner: – Put/ call ratio Laggards is fantastic who can trade for strategic and intraday and bullish traders. Take 19-05-2014 PCR laggards especially UNITECH Puts 632 and calls 3081 trades what does it means? It means calls are buying if u see entire day the ratio has increased huge. Based on PCR laggards traded intraday and delivery. Mc dowel in June PCR laggards and Arbitrate has given blindly profit of rs. 250. Like so many examples are with me. Most bullish futures : it gives bullish futures and arbitrage opportunity ex: June and July HDFC bank has a huge spread. In the june month spread 19 and july spread 10. I did this arbitrage. FNO corner gives open interest information based on this I find out OI losers and gainers.

Buy & sell signals: are good if we kept 10-15 min time it gives good trend can say 80% if trades with stoploss

Charts : are good, Trade with RSI defiantly get profits 90%. MACD also good indicator on 14-july RSI and macd has given a clear indication to buy nifty. Volume indicators are given the buy opportunity on day.

Finally : market tracker is very much useful for brokers and traders”
