

Dartstock™ Web

Advanced Web Trading front end

The Dartstock™ Web trading and analytics product offers capabilities that are traditionally found only on advanced desktop platforms. It is fast, intuitive, feature rich and includes advanced charting capabilities. Powerful scanners, a host of EOD reports and rich value-added data deliver a holistic trading experience to a keen market enthusiast.

## DASHBOARD

- Choice of two Dashboards – One with Analytics & orders and one with Charts
- Clean interface with Market watch & Analytics & Trading
- Market watch and for selected scrip show Mini chart + R & S Levels + Important Scrip stats on a single click
- Scrip stats Shows live indication of Cur volume Vis-à-vis Average 1 wk and 1 month volume. Current volume becomes blue when it crosses average
